

Assessing the security implications of climate change: Country case studies of Bangladesh

Sujan Saha

MSc (NTNU, Norway)

Bangladesh and Climate Change:

extremely exposed to climatic threats

Today

Total population: 112 Million

Total land area: 134,000 km²

1.5 m - Impact

Total population affected: 17 Million (15%)

Total land area affected: 22,000 km² (16%)

Methodology

Micro Level Analysis

Case Study

Primary Data

Interview

4 Slum Areas

300 Households

The Slum Area

No Basic Facility

Over Crowded

Drugs

Arms

Crime and Violence

Picture: Taslima

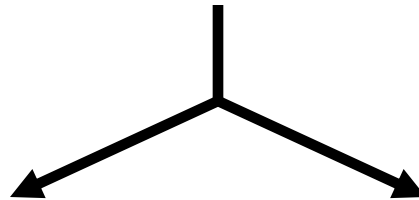

Result

Most of people migrated Climate Change

Lack of Effective Justice

Availability of Arms

Making huge stress on city

Making certain kinds of violent

Thank you for your kind attention
